## Guideline 1.2 Time-based Media

### Provide alternatives for time-based media

NOTE: If the audio or video is designated as an alternative to web content (e.g., an audio or sign language version of a web page, for example), then the web content itself serves as the alternative.

Success Criteria	Recommendations
<a href="#">1.2.1 Prerecorded Audio-only and Video-only</a> (Level A)	<ul style="list-style-type: none"> <li>A transcript of relevant content is provided for non-live audio-only (audio podcasts, MP3 files, etc.).</li> <li>A transcript or audio description of relevant content is provided for non-live video-only, unless the video is decorative.</li> </ul>
<a href="#">1.2.2 Captions (Prerecorded)</a> (Level A)	<ul style="list-style-type: none"> <li><a href="#">Synchronized captions</a> are provided for non-live video (YouTube videos, etc.).</li> </ul>

NOTE: Only required if there is relevant visual content that is not presented in the audio..</li> <li>While not required at level AA, for optimal accessibility WebAIM recommends descriptive transcripts in addition to audio descriptions.</li> </ul>
<a href="#">1.2.6 Sign Language (Prerecorded)</a> (Level AAA)	<ul style="list-style-type: none"> <li>A sign language video is provided for media that contains audio.</li> </ul>
<a href="#">1.2.7 Extended Audio Description (Prerecorded)</a> (Level AAA)	<ul style="list-style-type: none"> <li>When audio description cannot be added to video due to audio timing (e.g., insufficient pauses in the audio), an alternative version of the video with pauses that allow audio descriptions is provided.</li> </ul>
<a href="#">1.2.8 Media Alternative (Prerecorded)</a> (Level AAA)	<ul style="list-style-type: none"> <li>A transcript is provided for pre-recorded media that has a video track. For optimal accessibility, WebAIM strongly recommends transcripts for all multimedia.</li> </ul>
